Scope of v1.0.0 (main functionalities):

- Make it possible to watch/upload/remove videos.
- Implement functionality for likes and comments for each video.
- Collect data about the nr. of views/the regions from where the viewers are etc. and make it available only for the content creators in a separate section.
- Implement basic signup/login.
- Implement 2 types of system users with different permissions: content creator and basic user. (See use cases diagrams)
- Implement functionality for downloading a video.
- Implement functionality for searching a video by name or by content creator.
